Kettridges AV Horse Pellets

This product has been designed to meet the needs of breeder and young horses. The nutritional qualities are also suitable for use when returning light weight horses back into condition. It contains a high level of high quality protein which is required for the development of muscle, especially in young growing horses. It also helps in the production of milk in lactating mares. The following feeding rates will provide adequate daily vitamins and minerals for growth and lactation.

Nutritional Content:		Typical Ingredients:
Digestible Energy (MJ/kg)	12.0	Cereal Grains
Crude Protein - min. %	15.0	Bran & Pollard
Crude Fibre - max. %	10.0	Vegetable Protein
Calcium - min. %	1.0	Added Amino Acids
Salt - max %	0.2	Salt
Phosphorus min %	0.65	
Starch min %	26.0	Vitamins
NDF max %	25.0	Minerals

This product does not contain restricted animal material. It should be fed only to horses.

This product is best stored under cool and dry conditions and used within 6 months of production date. Horse Grower and Weaning Pellets are a concentrated pellet which needs to be fed in conjunction with good quality roughage, pasture, chaff and hay. To improve condition or fatten a light weight horse oats can also be fed with AVpellets.

Feeding Rates

Feeding requirements will vary depending on condition, appetite, workload etc. Changing a horse's ration should be done gradually over a period of time.

Recommended Daily Feeding Rates	
Weanling	5kg/Day
Yearling	4kg/Day
Mares Early Lactation	6kg/Day
Pretrainers	4kg/Day
Agistment Horses	Max 4kg/Day

This feed should be hand fed. It is important to ensure good quality, clean water is always available and that troughs are cleaned daily.

Kettridges operates a Quality Management System Feedsafe accreditation No 45
